BUILT TO LAST

FiberBuilt Umbrellas & Cushions is dedicated to manufacturing state of the art fiberglass ribbed umbrellas and beautiful replacement cushions, decorative pillows and seat pads to the hospitality market.

We are proud to provide contract quality shade products to many of the country's most prestigious hotels, resorts, country clubs and vacation ownership properties as well as restaurants, universities and many other hospitality locations.

Our innovative fiberglass support rib construction ensures strength, resilience and durability. We have developed a full line of contract quality umbrellas and pavilions that hold up to the harshest weather conditions - intense sunlight, high winds, salt air and driving rain - and will not decay or lose their shape.

Our flexible fiberglass ribs absorb wind gusts without breaking and last four to five times longer than traditional steel or wood ribbed umbrellas. For its inherent strength and longevity, the standard canopies of most of our umbrellas and cabanas are made of marine grade fabric.

We manufacture a limitless variety of sizes and shapes for custom replacement cushions, decorative pillows and seat pads to meet each properties' specific design requirements and budget. Styles are available in a diverse selection of fabrics, fills, decorative details and accents.
