TEAK, CRAFTS & INNOVATION

2018 COLLECTION

2018

As life gets faster and more complex, the need for quality time and space - the freedom to be you - grows too.

At Gloster we open doors to timelessly beautiful exteriors where your furniture sets the mood, just the way you want it to be. And we take the long view, using only the very best materials and techniques available.

Our aim is your pleasure - to be enjoyed in countless special moments outdoors.

OUR HERITAGE

Gloster's roots can be traced all the way back to West Africa in 1960, where a band of passionate entrepreneurs and furniture makers took the first steps on a long journey. By the early 1970's, increased demand and access to plantation grown teak led us to move our factory to Indonesia. Today, the same passion, conviction and pride that launched the Gloster brand, continues to fuel our business. We may live in a different world than the one occupied by our founders, but one thing remains the same - we are furniture makers whose sole focus is to design and build the world's finest outdoor furniture. Because we believe.

08
09

TEAK & PLANTATIONS

The benchmark hardwood for fine outdoor furniture for more than 700 years. With a beautiful, soft natural finish, every piece of Gloster teak originates from carefully managed plantations and is thoroughly inspected to ensure that quality endures. A close-grained hardwood with a high natural oil content, teak is exceptionally hard wearing, highly resistant to rotting and almost impervious to the effects of sun, rain, frost or snow - the first and only choice of timber for outdoor furniture.

Gloster's production of teak is characterised by our approach. We understand our resources and we know our wood. We only harvest what we have planted ourselves, and every tree that is felled was placed in the soil by one of the Gloster plantation's workers - workers whom we have known for a lifetime. A Gloster teak tree has a lifecycle of at least 50 years - and our wood can always be traced back to its origin. We believe that our customers must be able to trust us, so we treat the world, its resources and its people with respect. This is a core value at Gloster. Because it matters.

CRAFTS & INNOVATION

Gloster and fine craftsmanship go hand in hand. Our furniture is not the result of random mass production - human hands have created every rounded corner and every joint, and the quality of the furniture is the result of our employees' knowledge and skills. All of the craftsmen in our factories are proud of their ability to process wood and upholstery. They are craftsmen to their fingertips, and have worked with their trade for years - exclusively for Gloster. We look after them and are proud of them.

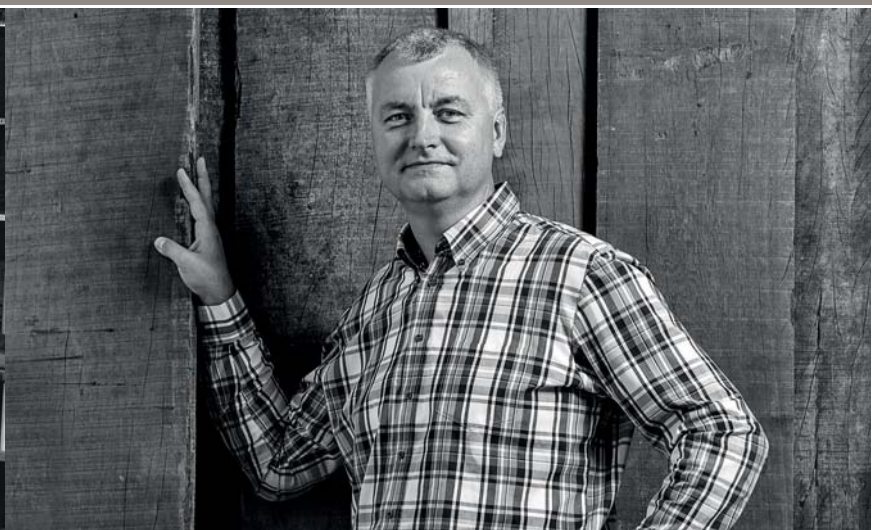

Our customers must also be able to feel the link to themselves when they buy our furniture. There must be a common history present, and a narrative of the life that we love to live. The furniture must speak a language that we understand - a language that awakens our curiosity. But we do not wish to stagnate in the past. We look forward and outward, so the past and future merge into a bold present to which we can all relate. Because we believe.

OUR DESIGNERS

Of course, great manufacturing is wasted without great design. Gloster currently works with several world-renown designers to create timeless outdoor furniture. Once a concept is approved, designers work closely with the development team at our factory to further refine their designs. And even in this digital age, we insist our designers travel to and spend time at our factory so they get to know our people, our raw materials and our philosophy. Because we believe.

TRUE CRAFT HAS MANY FACES

Just like the oil in our teak, a passion for excellence runs through Gloster. From the timber technician through to the CEO, each is a craftsman in their own way and each takes pride in their contribution to producing the world's finest outdoor furniture.

NOVELTIES ATMOSPHERE LOOP

New season, new colours, new fabrics, new designs and new materials. Essential elements that combine to define changes, novelties and innovations. Cutting edge design, innovative materials and the application of new techniques combine to create pioneering furniture collections for the modern era.

ATMOSPHERE DINING & LOUNGE

ATMOSPHERE BY CECILIE MANZ

Depending on your perspective, the word 'atmosphere' can conjure up a variety of emotions. The freedom to move, to enjoy independence or intimate moments - to be at one, whether alone or with those closest to you. But atmosphere also buzzes with chatter and laughter and dancing light - the sound of good times amongst family and friends.

For the new Gloster Atmosphere collection, Danish designer Cecilie Manz has drawn from observing couples, groups, friends and families interacting in seating areas - sliding down low in comfortable furniture, tucking up legs, resting side by side as stories are told and moments are shared.

"This is why it felt natural" Cecilie says, "to lower the whole setting, to enhance and welcome this feeling of comfort and quiet - when you wish to have slightly more relaxed moments, even a few centimetres in height makes a significant difference. Sitting lower pulls you into a familiar, soothing embrace - welcoming you to unwind and stay longer."

Cecilie has intuitively embraced the emotions behind the design in a powerful mixture of minimal, powder coated aluminium frames, generous boards of Gloster's signature teak and cleverly designed self-supporting upholstered panels.

Cecilie says "The materials in a project should reflect the usage of the pieces. Aluminium and teak are great materials for outdoor spaces, the finish of the metal is robust, and the solid teak gets a beautiful grey patina over time. Combined with the fabric options, the palette is subtle and harmonious, revolving around muted, sophisticated tones.

When asked if she can summarise her collection Cecilie smiles before answering; "It's quite simple really... the name is a reflection of the situation. It's all about creating atmosphere."

Relaxation is about perfect space. About comfort and convenience. A blend of personal style and the simplicity of keeping your favourite things close at hand. So it's no surprise that Gloster Lounge offers the ingredients to mix the perfect personal relaxation recipe. And, as with all the best ideas, simplicity is the key with our modular collections providing the building blocks to create almost limitless design possibilities.

GRID LOUNGE

GRID LOUNGE

Grid - a name that describes both function and mind-set. A grid of complementary units forms the basis of a totally flexible seating system where you can combine various individual elements to meet your specific needs.

BAY LOUNGE

BAY LOUNGE

Can you recall that sense of escape? Of finally leaning back, forgetting your worries and staring out across the water towards the setting sun? Henrik Pedersen set out to capture the feel of sitting by the coast when designing the Bay collection. The reclined position emphasises an introspective and relaxed state of mind and is intended to create a sense of being at rest in a safe-haven.

GRAND WEAVE

GRAND WEAVE

Nature converted into modern outdoor living. Following rural cues from hand crafted willow and hazel hurdles, modern materials are combined to create an up to date, resilient twist on rustic seating. Aluminium and manmade fibres are cleverly interwoven to create a beautifully tactile seating group at home in any surrounding.

The humble table. A place to meet, a place to eat, a place to share time, experiences and interact with one another. Tables can be large or small, social or intimate. Shapes range from round, through square to rectangular – some can even be extended for when you need to accommodate more people while others fold up for when storage is limited. All in all, the table has quite a job to do, so just as well we offer a wide variety of options to help find the one that is perfect for you.

And the perfect chair should never go unnoticed in the fray of a social occasion. Easy to move and comfortable from first sit to last drink of the night your seating should be the perfect accompaniment to any evening. Whether modern or traditional, conveniently stacking or designed to endure, each chair has its place.

MIX & MATCH

The freedom of choice is yours...

Confident styling and a strong, simple colour palette combined with a sophisticated fabric selection, means that the Gloster 2018 collection is more dynamic than ever. Experiment with different frame colours and fabrics, table sizes and top materials to find the configuration that perfectly fits both your style and your space.

MAZE

Distinctive interwoven ropes give the Maze collection its name which takes conventional woven furniture to a new dimension. Working with soft outdoor materials woven over angular, teak frames, the unique design offers both visual impact and exceptional comfort.

TWENTY FOUR YEARS SERVICE THAT MAKES FOR A CLASSIC

Graduating from the School of Architecture in Aarhus, Denmark in 1986, Povl Eskildsen is Gloster's longest serving designer. His first meeting with Gloster was during a furniture fair in Copenhagen in 1992 where he presented the iconic Weston Folding Chair. Unlike other folding chairs of the time, Povl had designed the Weston with innovative lumbar support in the back and using a different folding principle, to keep the front of the seat visible when folded and with a simple, integrated handle used for folding and carrying the chair.

Following the success of Weston, which at its peak sold over 20,000 pieces per year, in 1995 Povl went on to add the Madison collection - the first step towards the low, lounge type seating so evident today. In the same year Povl designed Kingston - one of the first truly comfortable and practical outdoor teak dining chairs. The idea was to make a lightweight arm chair that both saved teak and also allowed people to easily move the chair around. With only a minor correction on the prototype, the collection went into production and became an instant success.

Povl's ability to incorporate exceptional comfort into his designs without compromising the visual aesthetic, marks him out amongst his peers. Using a design language of classic Scandinavian inspiration with a contemporary twist, Povl has gone on to design many other collections for Gloster in both teak and mixed materials over the past 24 years, racking up more 50 trips to Gloster's manufacturing site in Indonesia in the process. For 2017, the iconic Weston design has been brought up-to-date within the Voyager collection, and further iconic designs such as Dansk, Maze and Havana continue Povl's legacy into the new millennium.

What is a home without a few unique enhancements to add that final touch of style? Solar powered, wireless outdoor lighting, heavy duty outdoor rugs, dual-function stools / side tables and a rustic basket to keep small items safe and at hand. Combining tactile materials with beautifully detailed finishes, the Deco range of occasional items is the stylish way to bring your outdoor experience to life.

A photograph of two glowing, white, rounded lanterns with wooden handles, sitting on a grey stone ledge. The lanterns are illuminated from within, casting a warm, yellow light. They are positioned in front of a dark, textured wall made of horizontal stone or wood planks. To the left, there is some green foliage. Below the ledge, a pool of water reflects the lanterns and the wall behind them. The reflection is clear and detailed, showing the lanterns' light and the texture of the wall. The overall scene is serene and atmospheric, suggesting a peaceful outdoor setting at dusk or night.

When choosing exactly the right outdoor furniture for your particular needs, function is just as important as style. In the following pages we have listed details of the various materials and fabrics we use for our furniture to help you plan your selections in detail. Further technical information, including downloads and care & maintenance instructions are available on our website www.gloster.com

MATERIALS

In addition to teak, we use a wide variety of other materials in the production of our furniture. Extensive use is made of powder coated stainless steel & aluminium, man-made wicker and sling material and there are specialist departments within our factory entirely devoted to the working of these materials to the same high standards as our teak components.

NATURAL FINISH TEAK

Teak's tight grain and high oil content make it exceptionally resistant to the elements. At Gloster, we use only the finest plantation grown teak, which is carefully nurtured an average of 60 years before harvesting. After more than 50 years and 10 million pieces of furniture, we have seen our responsible forestry practices not only serve the environment but also contribute to the growth of a superior lumber product.

POWDER COATED ALUMINIUM & STAINLESS STEEL

Our aluminium and powder coated stainless steel collections both utilise an electro-statically applied polyester powder coat finish, which completely blankets the surface of each piece. The result is a deep, rich finish that is extremely durable, corrosion resistant and virtually impervious to moisture.

BRUSHED STAINLESS STEEL

Crafted from 304-grade stock, Gloster Stainless Steel represents the industry standard for quality and design. The electropolished surface finish is both corrosion-resistant and low-maintenance. Electropolishing is an electrochemical process whereby the combination of an electrical current and an acid removes much of the iron from the surface, which leaves a lustrous, shiny surface and greatly enhanced corrosion resistance.

MAN-MADE WICKER

Our entire Woven range is handcrafted using lightweight, corrosion resistant powder coated aluminium frames clad in the highest quality manufactured fibre. Soft to the touch, this remarkable polyethylene material is completely weatherproof and resistant to both tears and ultraviolet light.

CERAMIC

Gloster ceramic table tops are made from a solid ceramic slab. Whilst the name suggests fragility, ceramic is actually harder than granite and is workable using techniques normally applied to glass and natural stone. Ceramic table tops are chemical resistant, fireproof, UV and heat resistant. Water absorption is close to zero, therefore, table tops are also completely frost-proof and weather resistant.

OUTDOOR ROPE & STRAP

Gloster outdoor rope is made from a vinyl coated, high strength polyester yarn, braided into a round rope profile of approximately 4mm diameter. Straps are constructed from acrylic which is stabilised to minimise the effect of UV light and is resistant to both mould and mildew.

THE TEAK STORY

A luxury timber valued both for its beauty and strength, teak is indigenous to just four countries in the world - Burma, Laos, Thailand and India. However, due to excessive, unsustainable logging over the past century, natural teak forests have practically disappeared in all of these countries except for Burma.

Fortunately for the world, teak continues to flourish in plantations throughout South and Southeast Asia, Africa and Latin America. It is from the well-managed, Indonesian plantations of state-owned Perum Perhutani, on the island of East Java, that we source our teak.

We asked Molyono, the Sawmill Manager at our factory in Indonesia, to fill us in on a few interesting facts about the plantation teak we use to make our furniture...

What is so challenging about sourcing teak?

Teak is one of the most sought after timbers for high end furniture production and as such there is a growing Global demand. Teak is not indigenous to Indonesia, it was brought to Indonesia by the Buddhist monks in the 16th Century from Burma and it was then expanded into larger plantations by the Dutch to service their ships plying the Dutch East Indies spice routes.

All Indonesian teak comes from plantation sources controlled by Perum Perhutani, the government body that controls all the plantations across Indonesia.

To ensure Gloster can obtain sufficient teak resource, we have a team of 22 graders who spend the majority of their time travelling to over 30 different locations across Java to select the ideal logs for our production. When selecting logs, our graders select the best logs with the fewest natural defects. This way, we ensure we obtain the best quality and yield recovery to maximise this valuable resource.

What's the ideal conditions for a teak plantation in Indonesia?

Teak trees are not indigenous to Indonesia but the climatic conditions on Java are ideal for growing teak. Teak grows best in sub-tropical conditions with temperatures ranging between 17 - 43 Celsius and with an annual rain fall of 1250 - 3750mm. In Java, teak can grow on a variety of soils, but for the best results, it needs moderately fertile soil with humus rich top soil - well aerated and free draining.

How would you characterise the teak wood in general?

Teak is widely known as the most valuable tropical hardwood and is mainly used for luxury furniture, ship and decorative building purposes. With its high natural oil content, teak withstands extreme weather conditions and is extremely stable once properly seasoned by kiln drying.

How can you identify the perfect Indonesian teak wood in terms of age, appearance & oil content?

Symmetrical in shape with limited surface defects such as knots and scaring. We look to choose logs that have a thin sapwood layer, which normally also goes hand in hand with a tree that has grown at a slower growth rate, meaning higher levels of density and oil content. We only choose logs with a minimum age of approximately 35 years and upwards to ensure the timber is of sufficient quality, whereas other companies use teak which is only 10 years old and has little density or oil content.

Any other stories to tell about teak wood on Java?

Teak plantations are really no different than any other crop, except that the growing cycle is far longer. It can take anything from 35 to 50 years for a teak tree to fully mature – Teak is a noble material and not something that can be rushed! The teak plantations in Java have been managed over countless generations by Perum Perhutani, and today their plantations comprise some 1.1 million hectares of teak, making them the largest teak plantations in the entire world. Perum Perhutani also works extensively with local communities during the rotational plantation cycle, where they allow the villagers to plant crops during the spell period between harvests.

TEAK WEATHERING

214
215

Contrary to popular belief, teak furniture does not require any special maintenance routine or any additional protection apart from occasional cleaning. Left to age naturally outside, teak will gradually change to a soft, silver-grey as the pigments in the surface layer of the wood begin to fade away. We recommend that you allow your teak furniture to weather naturally this way and simply clean thoroughly once or twice a year with our cleaning products. Teak furniture may also benefit from an occasional light sanding to remove any raised grain and restore a smooth finish to the surface.

Natural Teak

Weathered Teak

216

CARE & MAINTENANCE

Someone once said the best things in life are free. We love the sentiment but have to concede that some wonderful things come at a price and some things, no matter how perfect, demand attention. We know that you have invested in furniture designed to look great and endure and we have used our years of expertise to offer the best advice and products we can to ensure your furniture stays in the best condition for as long as possible. Like a car or home, a little care and maintenance will ensure your furniture continues to bring you pleasure year after year.

FURNITURE COVERS

218
219

Gloster outdoor covers are made from Weathermax, a heavy duty 100% solution dyed polyester material.

Weathermax is a performance cover material combining UV resistance, water resistance, breathability and durability. The ability of the fabric to breathe is essential in reducing dampness, heat build-up and condensation. This in turn reduces the chances of problems such as mould or mildew becoming present on the furniture underneath. We also add a 'breather' layer of Dacron where the covers are in contact with flat teak parts like table tops to further aid breathability.

With typical attention to detail, each cover is tailored to the unique dimensions of our product, ensuring a perfect fit. As well as covers for individual items, we also offer covers for all our stacking chairs, meaning that a single cover can be used for a stack of four chairs. For several of our modular furniture collections, adjacent covers are designed to zip together so the entire set can be covered without the need to separate each item.

All covers feature either a strap-and-clip connector or elastic seams to ensure security against wind.

CUSHION COLLECTION

THE COMFORT ZONE

A soft landing with structured and tactile surfaces, and the touch of different materials, are all factors which are important to Gloster.

Choosing the right fabrics and combining the right colours are essential for the right result - so we strive to make our fabric collection colour co-ordinated across the individual themes, making it easy for you to mix and match any way you like it.

DIRECTIONAL FABRICS

Fabric will run front to back on the cushion as you see it in the swatch book, fold-out swatch card or website configurator. This standard on some sectional corner or wedge units will cause a directional fabric to be sewn diagonal. Please contact your sales rep or customer service representative if you have any questions.

ATMOSPHERE FABRIC SELECTION

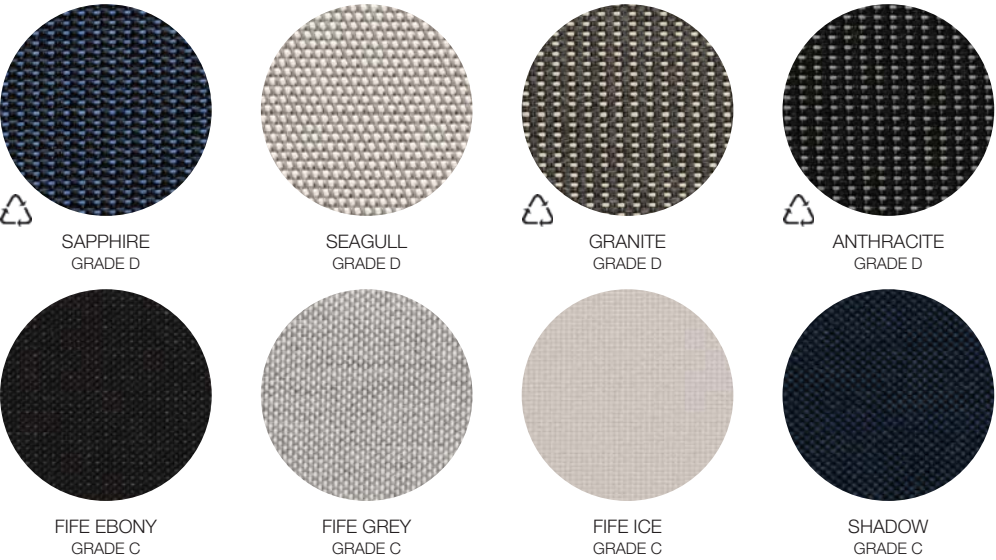

ATMOSPHERE FABRICS

Atmosphere seating items (Pages 22 - 29) are available in the 14 dedicated Fife fabrics above. These fabrics may also be specified for all other collections.

WATERPROOF OUTDOOR LOUNGE FABRICS

228
229

SUNBRELLA® RAIN FABRICS

Sunbrella® Rain – Dries faster for more outdoor fun. Sunbrella® Rain is a 100% waterproof version of the legendary Sunbrella® upholstery fabric. Its cornerstone feature is the ability to quickly dry, so you can spend more time enjoying life and less time waiting for cushions to dry.

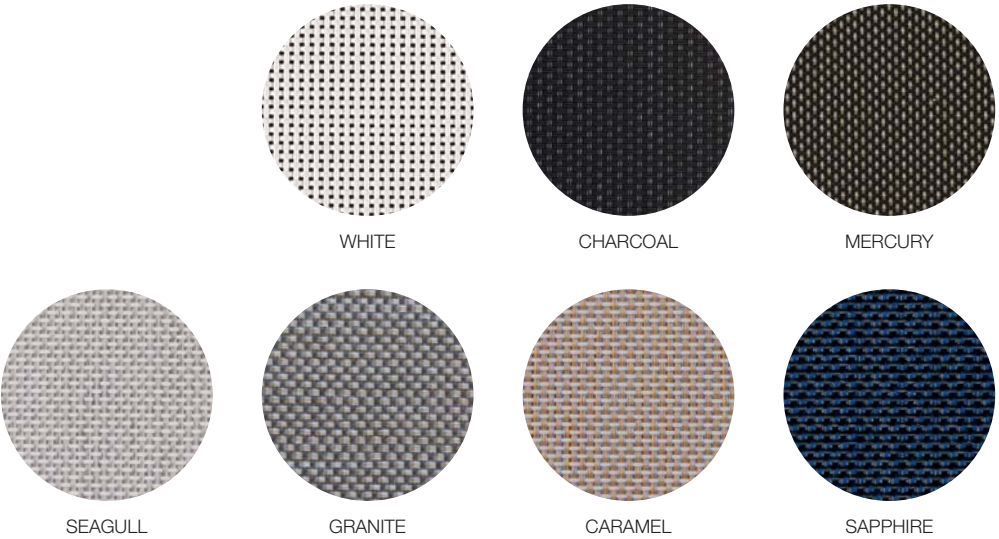

RECYCLED CONTENT FABRICS

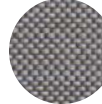

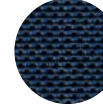

Sunbrella® Renaissance fabrics combine up to 50% post-industrial recycled Sunbrella® fibre with virgin Sunbrella® fibre to achieve vintage charm, rich colouration, soft feel and excellent performance. Due to the nature of the recycled content, Sunbrella® Renaissance yarns may exhibit random colour specks and shade variation. These slubs can sometimes be a contrasting colour.
