 Package weight per box: 50 lbs.

STEEL SINGLE SWING STAND

**D** An innovative blend of strength and streamlined design, of sleek lines and organic curves. Think of our Steel Single Swing Stand's circular base as your own personal boundary for keeping the outside world at bay, the overhanging poles like the naturally arcing trunk of some favorite tree swaying gently in support of your own sweetly swinging relaxation.

**Single Swing Stand | Taupe | SWSC1T**  
 Details: Powder-coated heavy-duty steel poles, taupe color.  
 Weight capacity: 350 lbs.  
 Product dimensions: 60.5" x 60.5" x 8'  
 Product weight: 80 lbs.  
 Package dimensions: 58.5" x 28.5" x 6.5"; 6.27 cube  
 Package weight: 80 lbs.

STEEL DOUBLE SWING STAND

**E** The clean lines and gentle upright curves are themselves superbly attractive, but this exceedingly ample steel support stretches far beyond sleek good looks; the heavy-duty powder-coated poles also provide a safe, stable, weather-durable haven for sumptuous swinging hang-time.

**SWSC2T Double Swing Stand | Taupe**  
 Details: Powder-coated heavy-duty steel poles, taupe color  
 Weight capacity: 450 lbs.  
 Product dimensions: 79.5" x 60" x 80.5"  
 Product weight: 94.5 lbs.  
 Package dimensions (ships in 2 boxes): 86.75" x 15.5" x 6.37"; 4.96 cube 76.25" x 8" x 6.37"; 2.25 cube  
 Package weight: 47.25 lbs.

## THE HATTERAS DIFFERENCE

### OUR ROPE

We start by unspooling miles of quality synthetic yarns into multiple strands that are then precision-twisted and balanced into rope. Three lengths of that new rope are next precision-twisted and balanced to create the hardy, uncommonly heavy multi-ply that our weavers use for our signature handmade hammocks. In keeping with our mission of relaxation innovation, we make, and use, only synthetic rope. All of our rope exceeds even the U.S. military's exacting specifications for strength, and leads our industry in quality, durability and softness.

- Solution-dyed DuraCord®, our own top-of-the-line rope, is the most colorfast rope on the market, made for heavy wear and also resistant to staining, rotting, mold and mildew. Not to mention that it's truly as soft as cotton!
- Our bright-white polyester rope is soft-spun for a comfort that likewise rivals cotton, but with an added durability for wonderfully weathering the great outdoors.

### OUR COMMITMENT

Since our humble beginnings in a backyard workshop in eastern North Carolina in 1971, our commitment has always been to making our products right here at home, in the U.S.A.

### OUR FABRICS

We use only all-weather DuraCord® and Sunbrella® fabrics, solution-dyed, so the color isn't dipped or washed in, but actually becomes part of the fabric thread fibers. DuraCord® and Sunbrella®, among the most colorfast outdoor fabrics available today, also are resistant to staining, rot, mold and mildew. Not to mention they're as soft as cotton to the touch!

- Our quilted hammocks are pillowed-up with polyester fiberfill batting, while our swing cushions are plumped with a thick layer of polyester Hollow Fiber PET. Each fiber is hollow (like a donut) and provides an increase in comfort by the air acting as an insulator, and is made from recycled plastic drink bottles.
- We use the vastly superior lockstitch for all sewing, not the simpler, more standard chain stitch, which can unravel a whole section of fabric in just seconds if accidentally snagged.

### OUR HANGING HARDWARE

The largest in the industry, plus the industry's heaviest steel to boot! On a hammock or swing, it's the hanging chains and rings that bear the brunt of the stress.

- We plate all of our hardware with zinc to protect against rust and ensure a longer outdoor life.
- Our signature one-piece ring-and-chain means the hammock chain assembly won't fall apart during storage.
- Each of our hammocks comes with tree hooks, the hardware needed to permanently sling one of our personal relaxation stations between a couple of shady trees, or between beams on a porch or deck.

### OUR WOOD

Chosen not just for how good it looks, but also for how well it holds up.

- **Cumaru**, also known as Brazilian teak. We use this dense, richly grained hardwood for our hammock spreader bars, because it resists rotting, is virtually nonabsorbent and naturally weathers to a beautiful silver-gray. The South American cumaru we buy for Hatteras Hammocks® is harvested only from managed forests.
- **Southern cypress**. Our award-winning Roman Arc® stands are crafted from slats of this distinctive watertight softwood. We use a radio-frequency gluing system for precision-binding the wood, finally hand-applying a honey-gold sealer to it.

### OUR STEEL STANDS

We use the heaviest-weight steel in the industry for our stands - for safety, sturdiness and solid good looks.

- Our **Tri-Beam® Steel Hammock Stand**, an original design, couldn't be simpler to assemble - no tools needed! The steel-core spring pins pop easily into place, holding the heavy poles safe and secure.
- Our signature 360-degree **Right Connection®** weld stably secures the foot and base poles of our Tri-Beam® Steel Hammock Stands. There has never been a Right Connection® failure.
- We finish all of our steel stands with our handsome, lightly textured **Cape Shield® Powder Coat**, among the thickest, most Earth-friendly industrial coatings available today.

I grew up in the hammock business. My father was, and still, is an entrepreneur, in every sense of the word. He started Hatteras Hammocks® in our hometown of Greenville, N.C., after his mother asked him for a hammock for the family beach cottage when my dad was heading to coastal South Carolina — hammock country — while working as a tobacco buyer. Dad thought: Why should I have to travel all the way to South Carolina to get a hammock? So while there, he bought two instead: one for the beach house, and one to take apart so he could learn how to make a hammock for himself.

My father created the first of the Hatteras Hammocks with his own hands and sold them one by one to customers from the back of his car. Today, over four decades later, he still walks the floors of the factory to make sure the quality of Hatteras embraces luxury, style, and commitment. The modern design and rich tradition of our hammocks, swings, and stands are truly the root of the Hatteras Difference.

Thank you for your desire to learn more about our products, and our company. Please allow us to learn more about your business and provide you the information you need so that together, we can build a profitable program for your business. This is so much more than just a business to us, because this business is personal.
